# ABSTRACT

The *ONLINE SHOPPING WEBSITE* is a web-based shopping system for an existing shop. The project objective is to deliver the online shopping application into an android platform as well. This project is an attempt to provide the advantages of online shopping to customers of a real shop. It helps to buy the products in the shop anywhere through the internet by using an android device. Thus, the customer will get the service of online shopping and home delivery from his favorite shop. *ONLINE SHOPPING WEBSITE* can be implemented for any shop in the locality or to multinational branded shops having retail outlet chains. If shops are providing an online portal where their customers can enjoy easy shopping from anywhere, the shops won't be losing any more customers to the trending online shops such as Flipkart or amazon. Since the application is available on the Smartphone it is easily accessible and always available.

The *ONLINE SHOPPING WEBSITE* aims to develop an online shopping for customers with the goal so that it is very easy to shop your loved things from an extensive number of online shopping sites available on the web. With the help of this, you can carry out online shopping from your home. Here is no compelling reason to go to crowded stores or shopping centers during festival seasons. To get to this online shopping system all the customers will need to have an email and password to log in and proceed with their shopping. Upon successful login, the customers can purchase a wide range of things such as mobiles, books, apparel, jewelry, infant care, gifts, tools, etc. can be dispatched using an online shopping system. It is extremely secure. Customer service is accessible
